

Cookie Statement

In this statement, you will find information about what cookies are, what cookies may be set when you visit this website and how to reject or delete those cookies.

What cookies are and how we use them

A cookie is a small file of letters and numbers that is stored on your device when you visit a website and contains information that is transferred to your computer. This information is sent back to the website on each subsequent visit, or to another website that recognizes that cookie.

Our website uses cookies to distinguish your device from other visitors' devices. This helps us to provide you with a better online experience, for example, by remembering your preferences, and also allows us to improve the site, for example, by measuring site visits and by ensuring that visitors easily find what they are looking for.

Consent to cookies

In some countries, the law requires your permission to place cookies on your computer. As a visitor in one of those countries, you may consent to our placing of cookies on your device, by selecting "I accept cookies" which will appear in a dedicated pop-up. Or, you continue to browsing the site after receipt of a cookie banner informing you that by continuing to browse the website you consent to our placing of cookies on your device. In both cases, you can change your mind at any time by opting-out (see below for more information).

To delete cookies that we previously placed, follow the instructions in the section "Opting-out."

Opting-out

At any time you can delete and block all cookies from this site. You can delete cookies in most web browsers and you should be able to block cookies by activating the feature on your browser that allows you to refuse the setting of some or all cookies. The "help" screen in your browser or computer user manual should tell you how to do this.

To find out more about cookies, including how to see what cookies have been set and how to manage and delete them, visit www.allaboutcookies.org.

Websites might use the following cookies

Name	Cookie Type	Description	Persistence
__utma	Performance	Used to distinguish users and sessions. The cookie is created when the javascript library executes and no existing __utma cookies exists. The cookie is updated every time data is sent to Google Analytics.	Persistent

		Used to determine new sessions/visits.	
__utmb	Performance	The cookie is created when the javascript library executes and no existing __utmb cookies exists. The cookie is updated every time data is sent to Google Analytics.	Lasts for 30 minutes
__utmc	Performance	Records when a page is closed and is used in conjunction with __utmb to measure how long visitors view our site pages	Removed when the browser is closed
__utmz	Performance	Notes how visitors find our website, for example, whether they come via a search engine, linked from another website or whether they typed in the web address directly. Also shows the sequence of pages visitors visit.	Lasts for 6 months
__ga	Persistent	Used to distinguish users.	2 Years
